# BITS Pilani end user Wi-Fi setup guide

To configure wi-fi on laptop, switch on the wireless button and then click on the wireless icon on right bottom of the task bar. A window will pop up which would resemble somewhat as shown in the following snapshot.

Follow the steps as highlighted in each of the snap shots for rest of the configuration. (blue colored ovals to move to next window/pop-ups & red colored ones for selection)
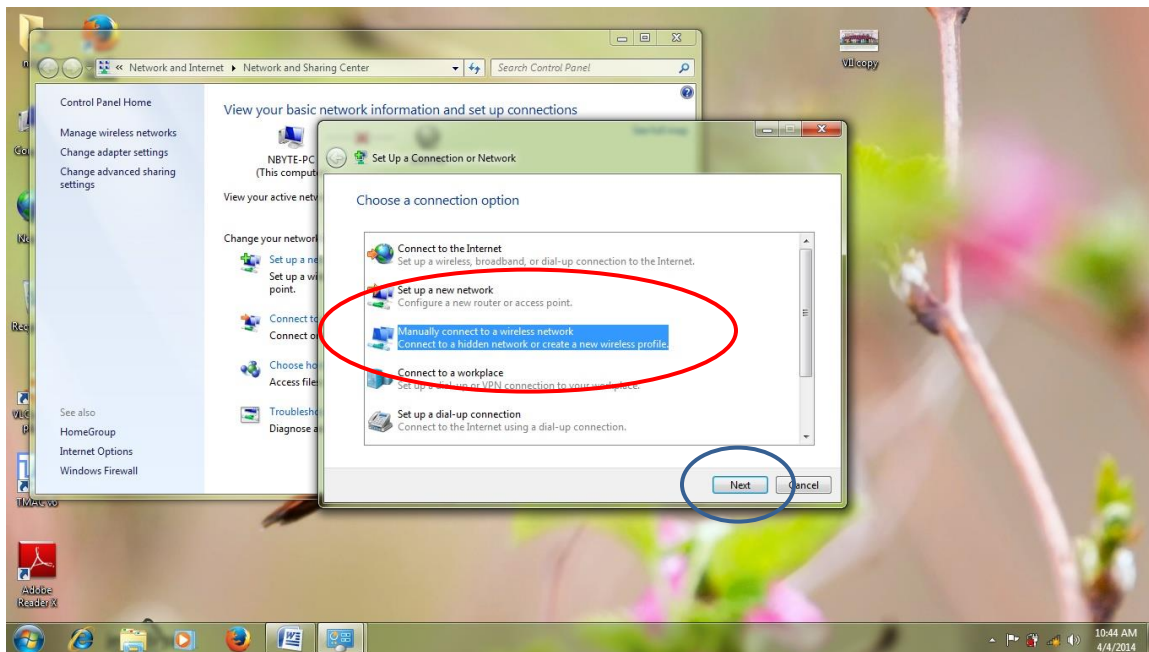

1. Select **open network and sharing center**

2. Setup a new connection or network

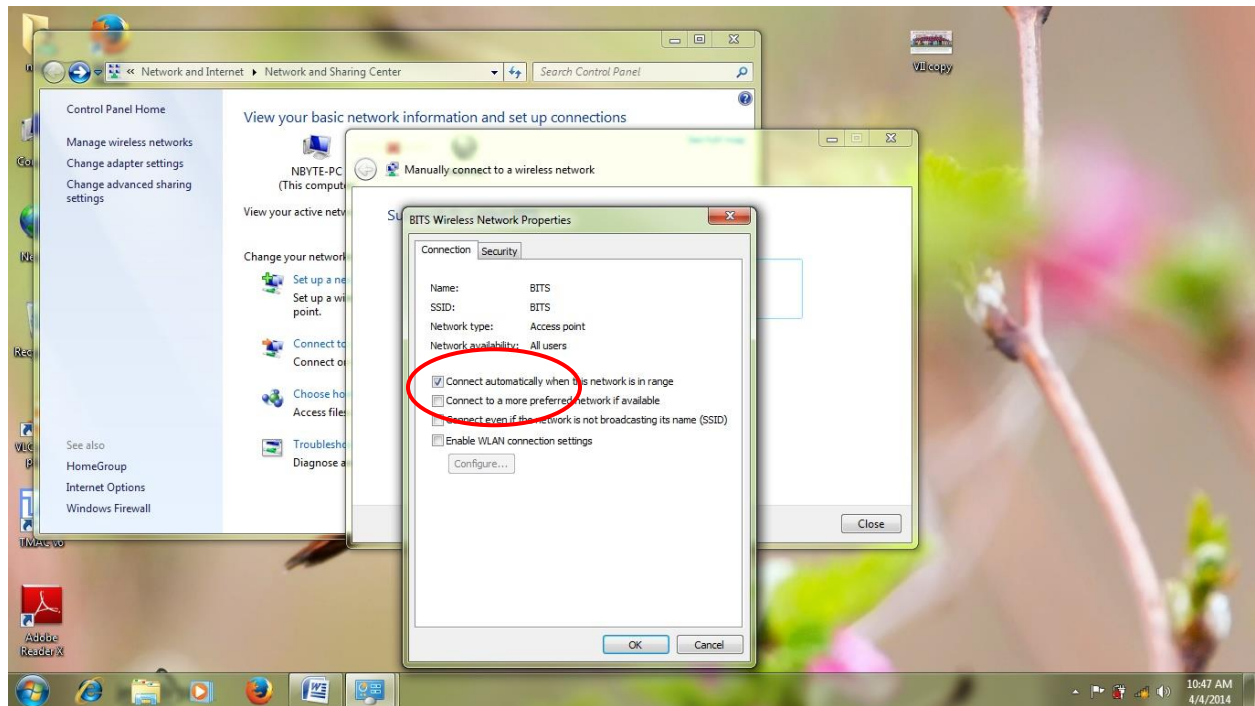

3. Manually connect to a wireless network

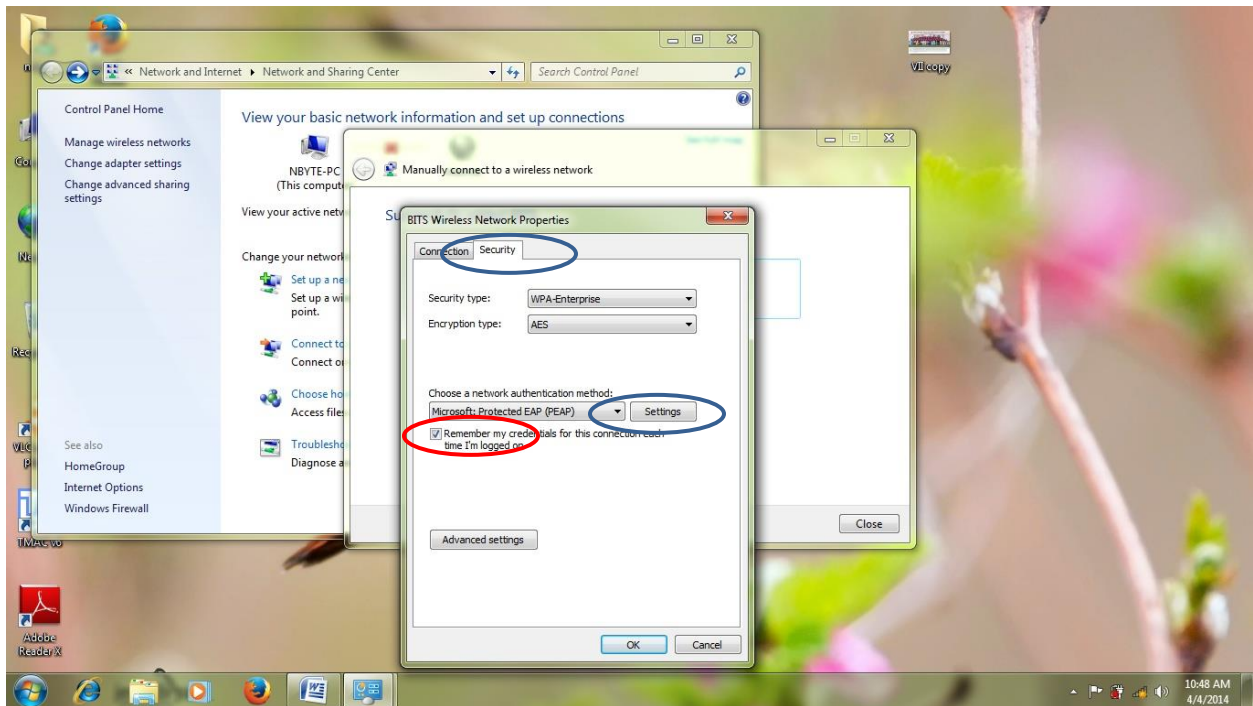

4. Enter the fields as given in next picture
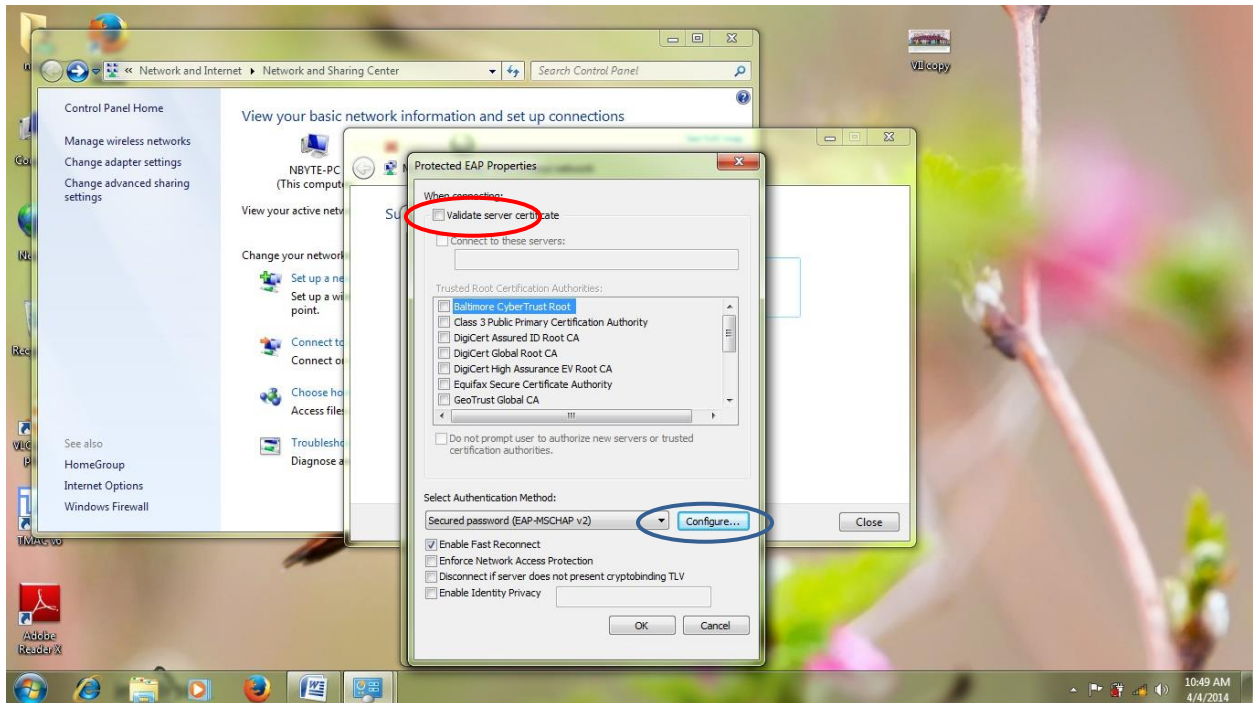

5. Change connection settings

6. Check the box as highlighted
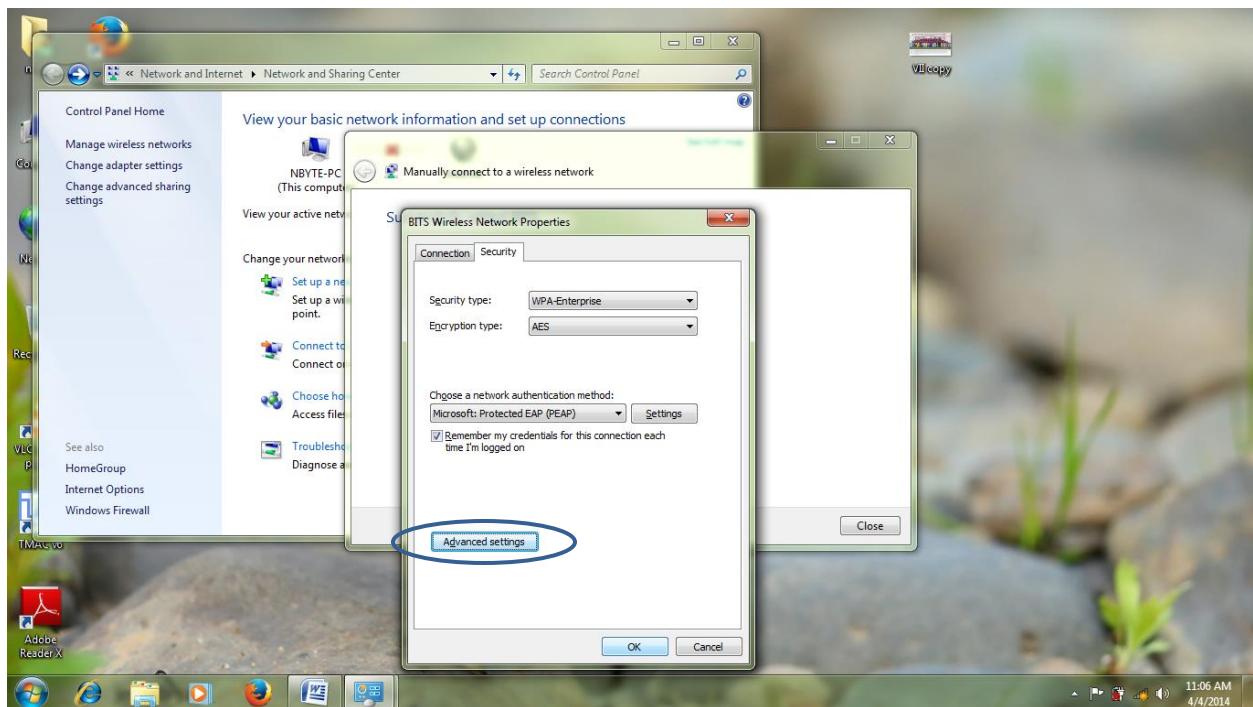

7. Select the security tab

8. Once you click the settings button as shown above, following screen will pop up.

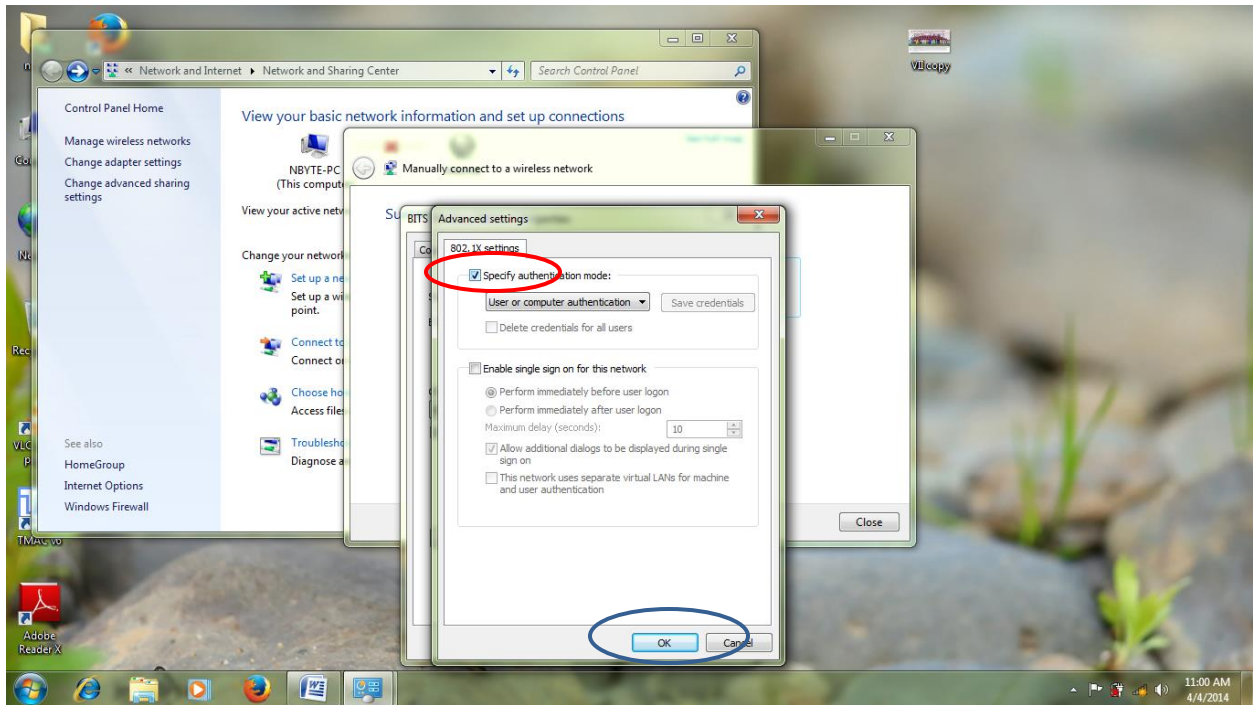

9. Click configure as shown above and follow steps in next screen
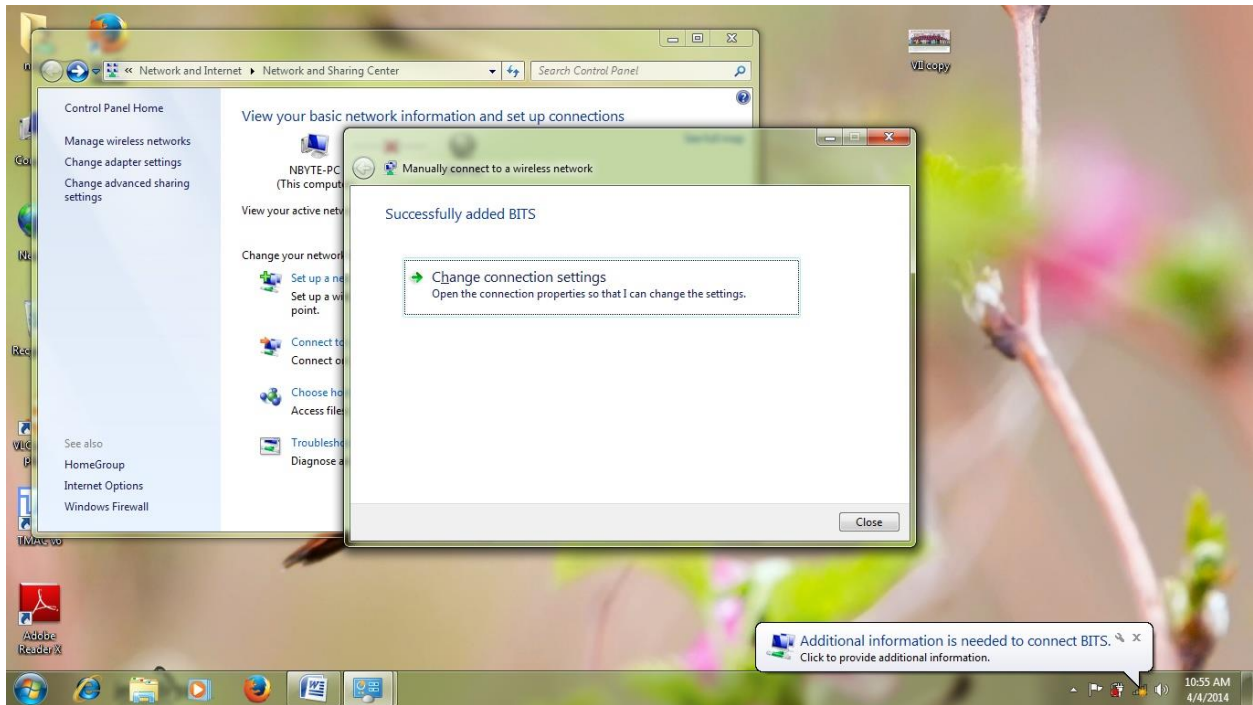

10. Click the advanced settings button

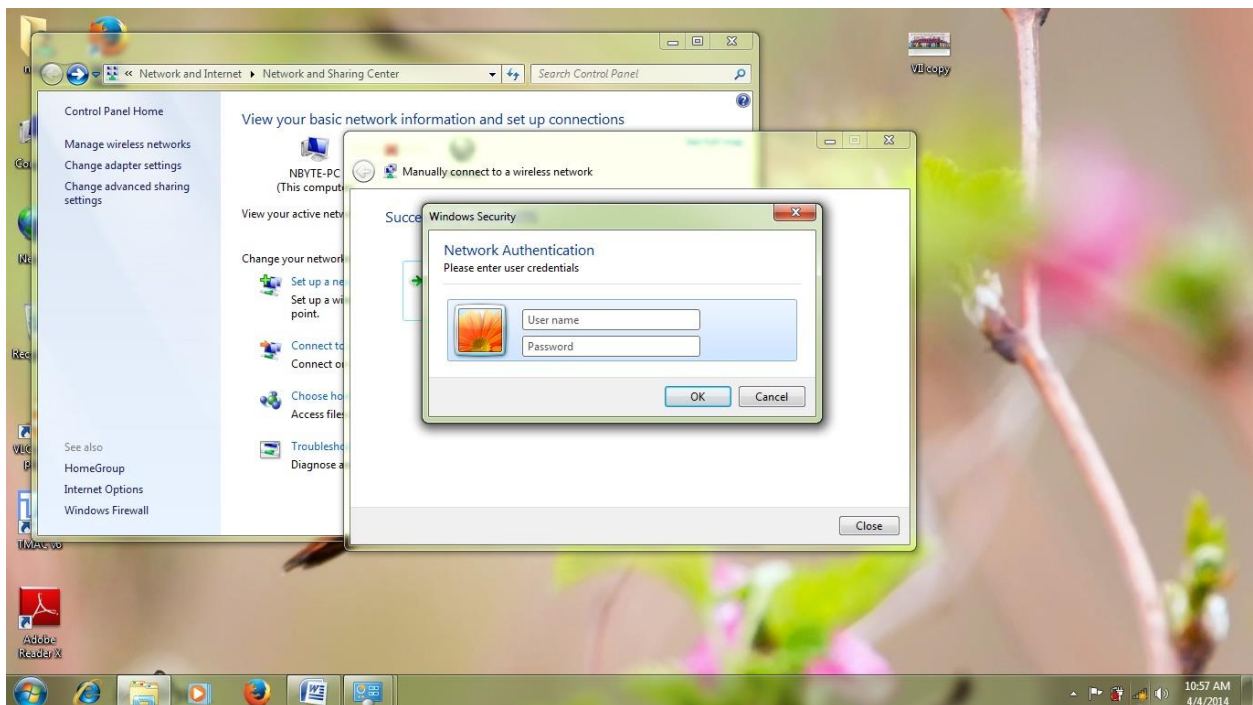

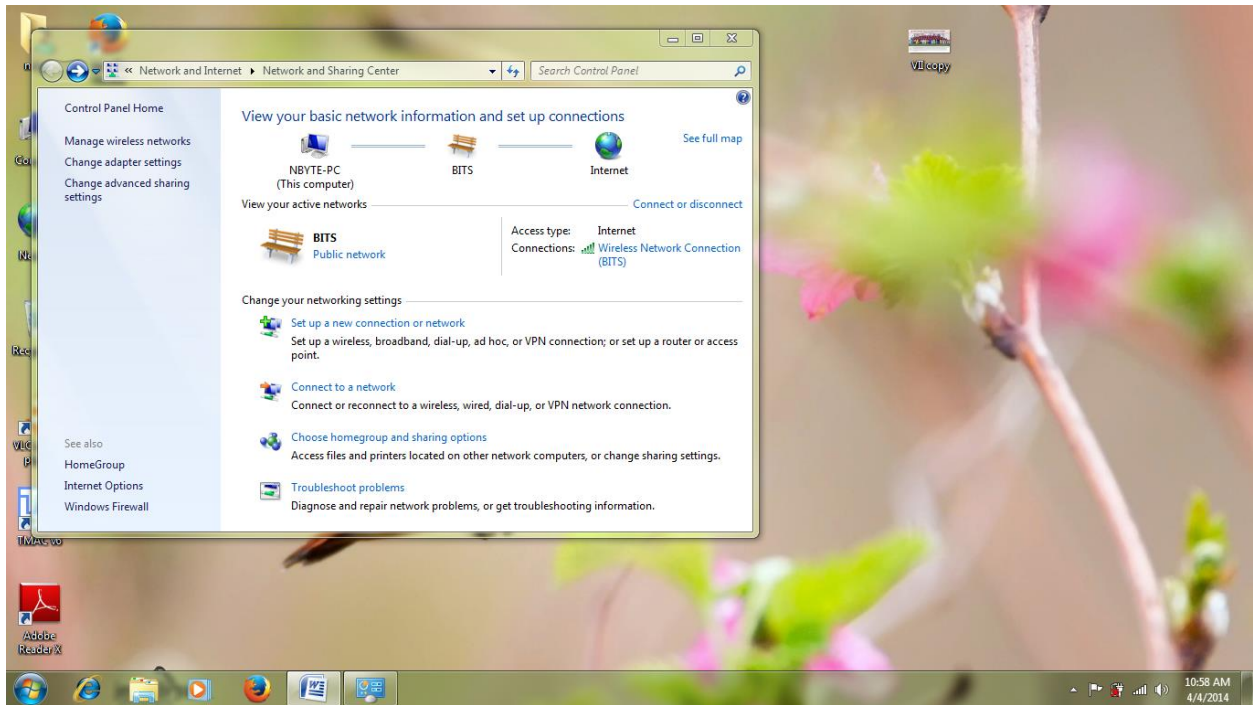

11. Check the box as shown below

12. Click Ok button

13. Enter User name & password

14. Once you have followed the above steps you will be connected to the BITS Wi-Fi network.
